

# Solar System Cards

I created these 3 part Montessori style cards specifically for use with [Apologia's Exploring Creation with Astronomy](#), but it can be used for any astronomy unit. I recommend printing the cards in color, laminating, and cutting them apart.

Some possible activities:

- Play memory using two sets of the cards.
- Cut the bottom part with the label off the card and try matching the names with the correct planet.
- Try putting the cards in solar system order.
- Anything else you can think of? Have fun!

*\*Pluto has been included in case you'd like to include it even though it is no longer considered to be a planet by International Astronomical Union.*
